DETAILED ACTION

Preliminary Amendments

Applicant's Preliminary Amendments A and B, Papers Nos. 5 and 6, both filed with the specification on November 27, 2001, were entered. The former amends page 1 of the specification by inserting before the first line a statement of continuing data and a claim to priority to the parent application while the latter instructs the deletion of claims "1-49" and the entry of new claims "50-58". The originally-presented claims numbered fifty, however, because Applicant had erroneously provided two claims numbered 31. Thus these original claims were renumbered, pursuant to 37 CFR 1.126, as claims 1-50 and the claims submitted with Amendment B were numbered as claims 51-59. When the original, renumbered, claims 1-49 were canceled, claims 50-59 remain, where claim 50, originally miss-numbered as claim 49 describes a subject matter that differs from the new claims 51-59, requiring the following requirement for restriction.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claim 50, drawn to a method for creating a cell line exhibiting a reduced expression of an eukaryotic elongation factor-2 kinase, classified in class 435, subclass 252.3.
- II. Claims 51-59, drawn to antibodies capable of recognizing an eukaryotic elongation factor-2 kinase, classified in class 530, subclass 387.1.

Inventions of Group I and Group II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. David A. Jackson on August 14, 2002, to request an oral election to the above restriction requirement, but did not result in an election being

made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
